B. structure/land
interface

hill/mountain - part natural part man - shaped

door break

like a bunker, or
underground facility

4 1/2 - overall impression of something long, smooth, and round. Other rounded and dome shaped appendages are not as tall as the central one. This target seems to be asymmetrical in shape. Seems to be part man-made and part natural. Some of the target feels hard, smooth, cold, and metallic. Another part feels hard/soft, gritty, rough, and natural
